Manufacturers of Superior Quality
Rolling Steel Doors Since 1972

High Security Doors
Proven Protection Against Theft, Riots, Vandalism and Looting

We're Always Rolling™

www.AlpineDoors.com
Protecting Lives, Property and Inventory

Poorly manufactured rolling doors will typically fail when faced with extreme threats. Why? They are simply not engineered or built well enough to withstand unconventional abuse. Slats and bottom bars aren’t very secure. Inferior materials are often used. The list goes on. While this may be acceptable under normal circumstances, sub-par or improperly specified rolling doors will not hold up against people intent on tearing them apart. They will gain entry - often with astonishing speed. Property will get destroyed or looted costing from several thousands and even into millions of dollars. These tragedies can be prevented and property defended with a properly engineered rolling door.

Alpine’s security doors are specifically designed to handle extreme threats. The strength of these high performance doors comes primarily from several key features that standard doors lack including:

**End Locks** - added to slat ends to lock them in place and prevent them from sliding left to right.

**Riot-Lock™ System** - added security prevents the curtain from being torn away from the guides. Available in single and double configurations.

**Bottom Bar Protection Locks** - these secure the bottom bar in place making it difficult to pry the door open from the bottom.

**Strong Slats** - constructed from higher gauge metals, with insulation options for added protection. Our Riot-Tite™ doors feature interlocking double slats offering the maximum level of security and impact protection. Ballistic resistance is available.

"The bitterness of poor quality remains long after the sweetness of low price is forgotten.”
~Benjamin Franklin
Economy Security Doors

These cost effective security doors offer both strength and value. Don’t let the name fool you. These doors offer standard features usually found only in competitors’ mid and upper-range offerings.

Features

- 4.0” curved slats in 22ga galvanized steel
- Roll formed guides made from high strength steel making them difficult to open up or spread apart. Field welded at 18” intervals.
- Steel stamped end locks prevent lateral movement of slats
- Additional security options include slide locks, pin locks and guide locks
- Installed on the interior, exterior, face of wall or between jambs
- Primed in tan, white or gray
- Powder coating in any color with optional anti-graffiti properties
Our standard lineup offers enhanced protection over our economy doors. Curtains consist of either 2/3" flat or 3" curved slats. Several material thicknesses and optional security features are available.

**Features**
- 2-3/4” and 3” profiles in 22ga minimum with options for 20, 18, or 16 (14ga available for 3”)
- Galvanized Stainless Steel or Aluminum
- High strength structural steel guides
- Optional Riot-Lock™ advanced locking system provides security across the full height of the door, making it virtually impossible to remove curtain from guides
- Tamper-proof hardware available
- Installed on the interior, exterior, face of wall or between jambs
- Tan, white or gray primed (Wind-Tite® only)
- Powder coating in any color with optional anti-graffiti properties

**Lock-Tite™ Guide Security**
Secures curtain to guides, enhancing overall door security

---

**3” Curved Slat Non-Weather-Stripped Door**
- 3.0” curved slats in 22ga minimum with options for 20, 18, 16 or 14 ga
- Strong and cost effective door
- Contoured slats offer enhanced strength compared to flat slats
- Heavy duty construction design
- Manual push up, hand crank, hand chain or motor operated
- Up to and exceeding 60’0” in width

**2-3/4” Flat Slat Door Weather Stripped Door**
- 2.75” flat slats in 22 ga minimum, options for 20, 18 or 16 ga
- Cleaner profile in the closed position
- Strong and effective protection against high wind, water penetration and other inclement weather
- Manual push up, hand crank, hand chain or motor operated
- Up to and exceeding 60’0” in width
Maximum Security

Our maximum security doors boast the highest level of protection available, hands down. The impressive Riot-Tite™ model includes the Dual Riot-Lock™ system as standard, is impact resistant and has strong insulative properties. Ballistics resistance is available as well.

Features

- 2-3/4” and 3” in 24ga - 16ga, (varies by model)
- Galvanized Stainless Steel or Aluminum; primed tan, white or gray
- Industry leading dual layer interlocking slat system
- Contains polystyrene insulation at a min 15/16” thick
- High strength structural steel guides
- Riot-Lock™ advanced locking system provides security across the full door height, making it almost impossible to remove curtain from guides
- Tamper-proof hardware available
- Optional Smart Security System will close multiple doors upon alarm
- Fail-safe options allow closure during power failure
- Ballistic resistant configurations available
- Installed on the interior, exterior, face of wall or between jambs
- Powder coating in any color with optional anti-graffiti properties
