

E-Series™ Service Door Features

- High quality, low cost security space saving solution
- This model can be combined with a grille section, or have fenestrated slats that allow a viewing area while maintaining security
- Torsion spring counterbalanced

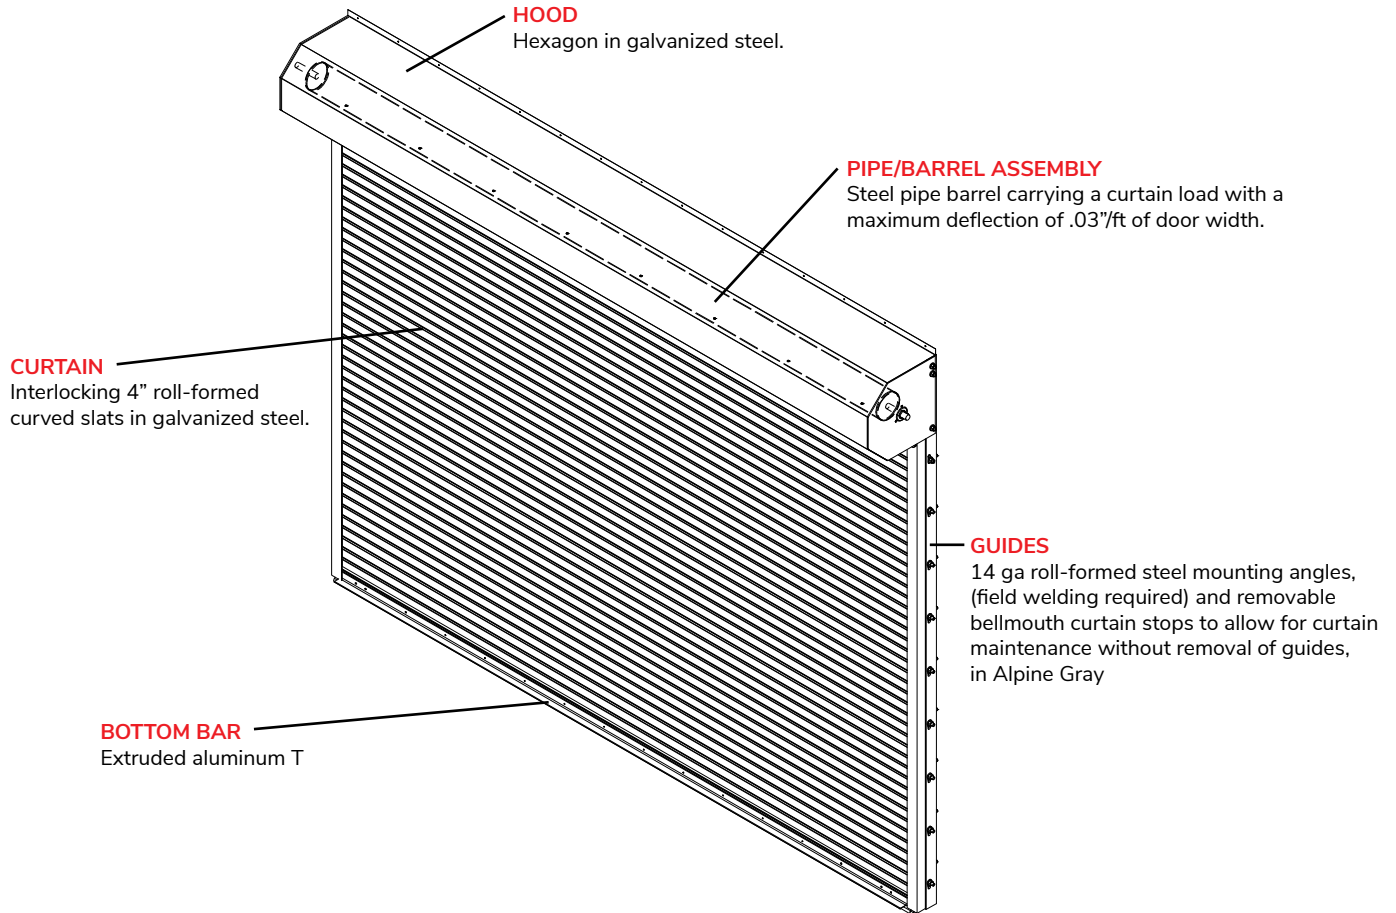

E-Series service doors are used for store fronts, alleyways, warehouses, loading docks, car wash facilities, parking garages, aircraft hangars, fire houses, truck terminals, police stations, correctional facilities, manufacturing and retail applications among others.

Functional Benefits

- 4.0" curved slats
- Strong and cost effective with contoured slats.
- Heavy duty construction design.
- Riot control options include structural guides with riot-resistant wedge bar, and upgraded curtain with our Serv-Dawn model (up to 16 gauge), and Alpine's Riot-Lock™ advanced locking system provide continuous locks that protect each slat individually.
- Doors can be manual push up, hand crank, hand chain or motor operated. All operators can be adapted to specific conditions.
- Can be installed on the interior, exterior, face of wall or between jambs.
