

E-Series Vision[™] Grille Features

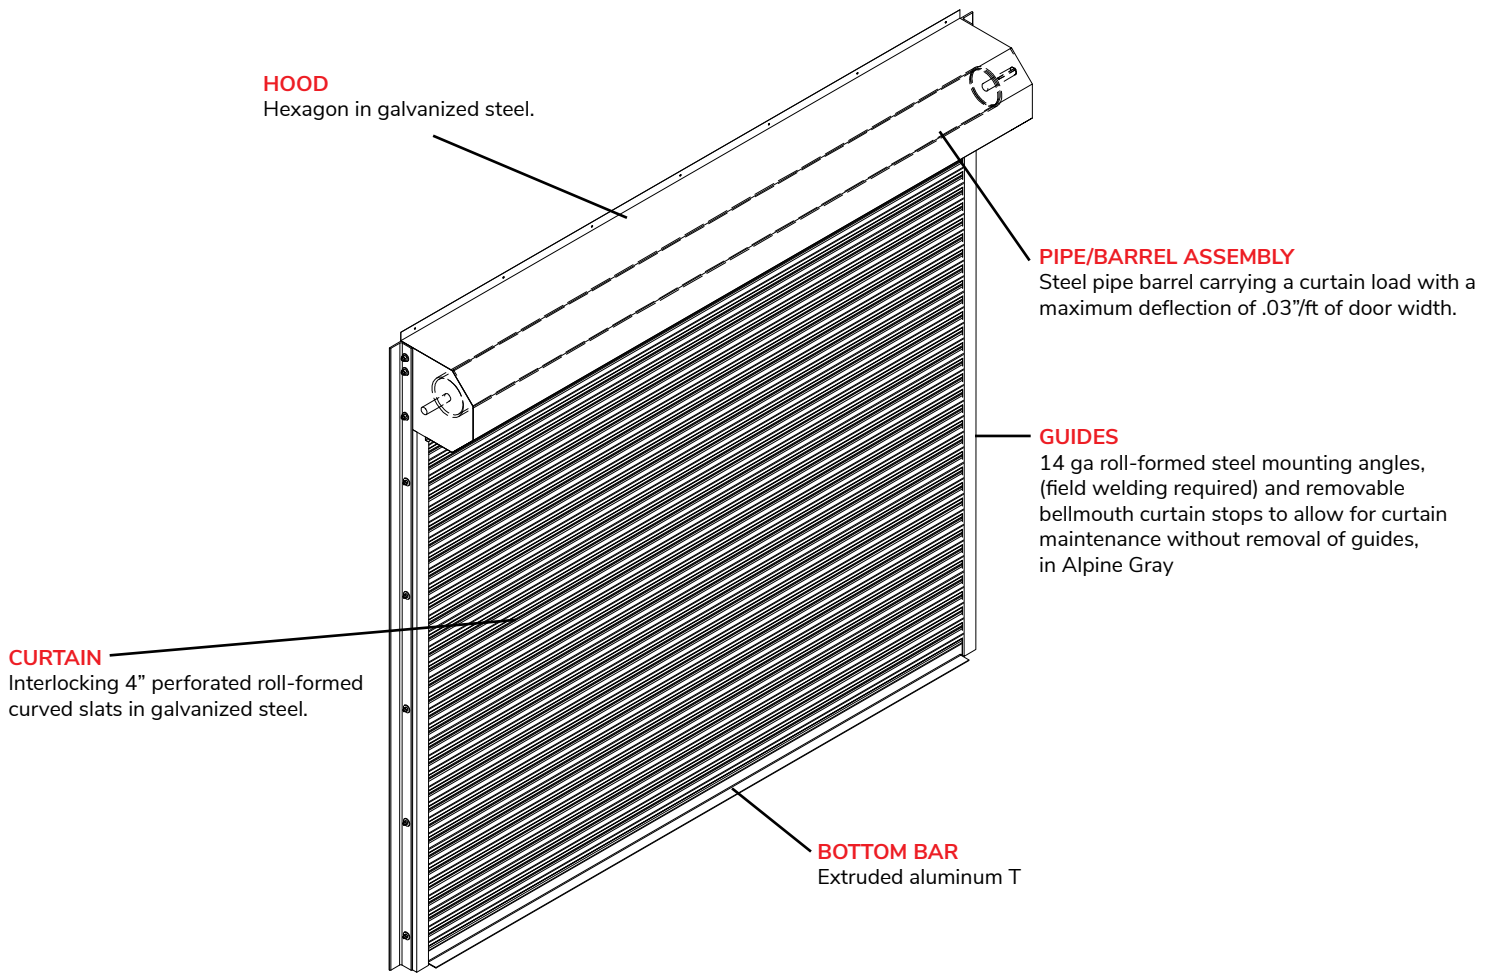

- High quality, low cost security space saving solution
- Perforated slats
- Torsion spring counterbalanced

E-Series Vision[™] doors are used for store fronts, warehouses, loading docks, car wash facilities, parking garages, aircraft hangars, fire houses, truck terminals, police stations, correctional facilities, manufacturing and retail applications among others.

Functional Benefits

- 4.0" perforated curved slats in 22ga.
- Strong and cost effective with contoured slats.
- Doors can be manual push up, hand crank, hand chain or motor operated. All operators can be adapted to specific conditions.
- Ideal for security applications such as sally ports, parking lot entries, or other areas that do not require thermal values.
- Can be installed on the interior, exterior, face of wall or between jambs.

Operational Requirements

- Manual push up, hand chain or motor operated.

Optional Materials and Finishes

- **Finish Options:** ExoShield™ Powder Coating.
