

Counter-Vision® Features

- Coil upward requiring little side or head room
- Enjoy the benefits of a see-through design with an attractive appearance
- Can be motor or manually operated
- Ideal for all pass-through openings
- Provides security and ventilation

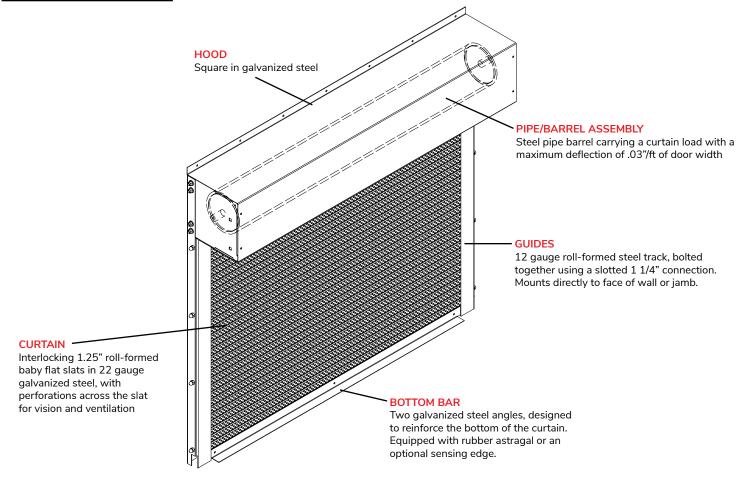

Alpine's Counter-Vision shutters provide security for school cafeterias, healthcare facilities, pharmacies, parts counters, ticket counters, bank counters, hospitals and airport concessions, among other applications.

Functional Benefits

- 1.25" Perforated Baby flat slats, 1/2" deep, made of 22 gauge galvanized steel
- Each Alpine Counter Shutter is built to the exact opening size requirements for your specific project
- Doors can be manual push up, hand crank, or motor operated. All operators can be adapted to specific conditions.
- Alpine's rolling shutters are highly durable and are designed to withstand day-to-day use
- Provides excellent protection along with a clean, attractive appearance
- Can be installed on the interior, exterior, face of wall or between jambs

Operational Requirements

Choice of push-up, hand crank, or motor operation

Optional Materials and Finishes

 Material Options: prepainted or stainless steel with optional ExoShield™ Powder Coating on bottom bar and guides.
