# Why **Alpine**?

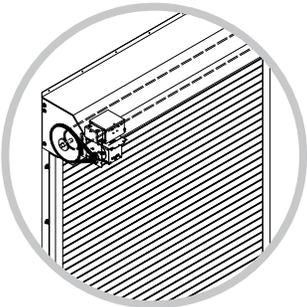

Alpine Overhead Door is an innovative NY-based manufacturer of rolling steel doors for over 50 years. We're proud to say that architects love working with us! Here's why:

## **Impressive Range of Styles & Options**

---

- Doors for almost any application - providing protection against wind, storms, fire, noise, theft, riots, and more
- Many options for materials, finishes, operation, security, and visibility
- Every door is made to order, giving you ultimate flexibility
- We excel at large scale/high volume projects

## **The Tools You Need, When You Need Them**

---

- Submittal docs including CAD drawings, 3-part specs, and cut sheets
- Performance data (STC, U-Factor, windload, fire ratings, seismic, etc.)
- LEED rating data for our materials and resources
- Quick response and turnaround times for anything you need

## **A Reliable Partner that Answers Your Questions**

---

- Our accessible on-staff engineers and customer service reps speak your language while providing deep technical product expertise
- They'll provide dimensional and mounting condition counseling and help you navigate code compliance and performance requirements

## **Driven by Innovation & Quality**

---

- Innovation is at the core of every Alpine rolling door system, we hold over a dozen utility patents, and continuously develop new solutions
- We are an ISO 9001:2015 Registered Firm that operates under Lean Six Sigma principles to increase efficiency and reduce waste

# Our Doors

Strong · Secure · Durable · Versatile

Over 60 Standard Models Available to Suit Any Application

## Service Doors

- Flat or curved slats, many materials, gauges, finishes, and mounting configurations
- Insulated, sound resistant, and weather strip options
- High speed, high cycle models
- Slats may be perforated, fenestrated, or contain Vision-Lite see-through windows for enhanced ventilation and visibility

Insul-Sound®  
Sound-Rated Insulated Door

Wind-Tite®  
Fully Weather Stripped Door

## Fire & Storm

- Fire doors available as conventional, auto reset, insulated, smoke sealed and windload rated (can be combined)
- Fire rated up to 4 hours, with integrated automatic closing systems & ADA features
- Storm doors are approved to strict Dade County standards
- FEMA door is tested and approved to ICC 500-2020 and FEMA P-361

Fire-Tite®/Fire-Storm®  
Fire & Hurricane Rated Doors

FEMA-Tite™  
Tornado Door

## Grilles & Shutters

### Grilles

- Ideal for interior or exterior uses where visibility, security, and airflow are needed
- Light duty, standard duty, and maximum performance high speed/cycle models
- Numerous patterns available
- Emergency egress option available

### Shutters

- Flat slats in various materials and finishes
- Perforated, grille, and fire-rated options

Industrial Grille™  
Heavy Duty Grille

Counter-Shutter™  
Counter Door

## Specialty Doors

Super-Imposed/Double Doors

Wicket Doors

Integral Frame Shutters

## Operation

### Light Duty/Space Saving

Our box spring and tubular operators are compact and ideal for less demanding uses such as grilles or counter shutters.

### Standard

Even our "standards" are designed for heavy duty use. Gear reduced and belt-driven with various control options including myQ.

### High Speed and Performance

Fast, springless direct drive operators deliver excellent performance without the need for sprockets or roller chains.

### Redi-Assist™

Alpine's proprietary manual chain hoists feature adjustable braking mechanism for controlled descent with failsafe override. For new or retrofit installations.

### Fire Door

Offering both conventional and auto resettable models, various release options, including alarm system integration.

US Patent No. 11,339,610 B2  
CN Patent No. ZL 2020 1 1037000.0  
Additional International Patents Pending

## Finishes

### Standard Finish Coat Colors

Alpine Grey   Alpine Tan   Alpine White   Galvanized

Available on curtains (excluding grilles), guides, bottom bars, hoods, and bracket plates.

NOTE: All colors/finishes shown are approximate.

### Exo-Shield™ Powder Coating

Standard and custom RAL colors.
